

R_MPinv

```
graph LR; R_MPinv --> C_MPinv; R_MPinv --> CR_svd; R_MPinv --> nrow; R_MPinv --> ncol; C_MPinv --> CR_svd; CR_svd --> nrow;
```

A flowchart illustrating the relationships between several variables. The variable R_MPinv is the starting point on the left, represented by a black box with white text. It has four outgoing arrows: one to C_MPinv (top), one to CR_svd (top-right), one to nrow (far right), and one to ncol (bottom). C_MPinv has an arrow pointing to CR_svd. CR_svd has an arrow pointing to nrow. All other variables (C_MPinv, CR_svd, nrow, ncol) are in white boxes with black text.
